REDUCE—REUSE—RECYCLE

Awareness raising campaign for the promotion of waste Reduction, Reuse and Recycling in Cyprus

Waste management guide.

www.rethink.com.cy

ReUse

We are the “single use” generation. Accustomed to the ease of replacing products, we have lost the creativity for reusing things before disposing them. By reusing products, no matter how small and trivial it may look, we contribute to a cleaner environment and a healthier planet.

TAKE ACTION NOW!

Reuse whatever you can use before you dispose it!

Reuse glass containers!

Find creative solutions for crafts and sell or give away what you don't need!

eRecycle

In the vocabulary of the modern, conscious citizen there is no place for the word “dispose”. It has been replaced by the word “Recycle”. Recycling enables us to transform what was thought as rubbish into raw material for a new, useful object, thus drastically reducing environmental pollution.

TAKE ACTION NOW! Simply recycle your packaging waste into the PMD, paper and glass recycling and contribute to a better environment!

Did you know that?

For every ton of glass recycled, 315 pounds of carbon dioxide are prevented from entering the atmosphere.

Every ton of paper recycled saves 3.6 sq. meters in the landfill

Every ton of cans recycled saves 26 barrels of oil.

Recycle paper

The Paper category includes:

- Paper packages and containers of: Medicine, shoes, cereals, appliances.
- Newspapers
- Magazines
- Advertising leaflets
- Office paper

Recycle pmd

The PMD category includes:

Water, Milk, Orange, Lemon & other squash, Juice, Cleaning Material, Restoring Material, Liquid Soap & Shampoo, Washing Powder & Liquid, Conditioner & Freshener
- **Metal Packages**
Tins, Beer, Coffee Drinks, Soft Drinks, Small Aluminium Disks, Metal Closures
- **Paper-based Drink Packages (Tetra Pak type)**
Milk & Cream, Wine & Other Drinks, Juice

Recycle glass

The Glass category includes:

- Glass bottles
- Glass vases
- Other glass containers

Recycle batteries

Some of the appliances we use in our every day life and require batteries for their operation are:

- Pocket games
- Toys (radio control, dolls, etc.)
- Cell phones
- Cordless phones
- Cars
- Laptops
- Lenses
- Watches
- Cameras
- Electric drill and other hand tools
- Camcorders
- Remote Controls etc
